Dear F.C.C. Division:

I would like to apply for one the broadcasting licenses that the F.C.C. is issuing for the communities. Our chief engineer told us to make this petition, so I will inform you as to why we need this radio station in our community.

First of all our community is centered in the State of California by the Monterey Bay. Our little town is Castroville, we have no radio station, no newspaper and no Police service, we depend on the County Sheriff Department. We have no voice to inform our community of events or emergencies and we as the rest of the country have an infested community of gangs and violence.

I would like to tell you a little about myself, I am an ex-minister, however, I still counsel with different religious organizations to teach them about awareness in their families and congregations about drug addiction and youth violence, on how to act upon this serious matter. I would also like to tell you that I am disabled, I have diabetes and because of my illness I recently had my left leg amputated, I spent quite a lot of time in the hospital, however even at the hospital I would still conduct my volunteer time by playing the piano to the Extended Care floor, these are individuals who are seniors in their age and individuals who are in a vegetated state. My leg may be gone but my heart and mind are still in the right place for what I am trying to do.

I am a volunteer D.U.I. facilitator, I also counsel for the Monterey Probation Department for the youth, this work I do with no pay and do it so that we can start to make a difference in our communities. I also hold lectures on prevention and awareness to the community of gang activity. We have just finished a pilot for a motion picture in which we use the original ex-gang members for this production, which has excited a lot of the youth to get involved in the acting classes that we provide to the community free of cost. I also teach music instrumentation and recording production, this is mainly why it is extremely important that you consider this request.

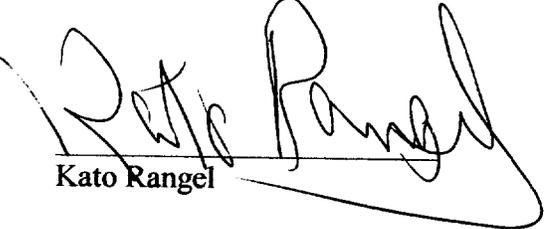

No. of Copies rec'd
List ABCDE

041

Please honor us an oppportunity for this broadcasting license that would give us the voice that is needed for our community, my wife and I both hold an F.C.C. 3rd class license and we have a 1st class engineer willing to work for this community in which he lives.

If there is any additional information you should need, feel free to contact me at my home number (831) 449-8939 or write to me at my home address which is located above.

With much great respect and honor, I thank you.

Kato Rangel
