I am requesting some information on operating a low wattage non-commercial radio station. What is it that I need to know about getting one set up in this particular area in Arkansas. There is a lot of empty space on the FM dial in this area. So, which frequencies are available? Whom do I need to contact to get more info?

Also, I need to re-apply for a Radiotelephone Operators Permit. I had lost my last one and need another. What is the current fee for this? Have your policies changed about acquiring different types of licences? Please send any info on this.

Any and all help will be appreciated! If any questions, feel free to reach me at (870)467-5603.

Thanks for your time.

Ryan K. Nell
