Dear Sirs:

As Sales Manager of a three station operation for Iowa City Broadcasting in Montevideo, Minnesota, I am totally against the FCC's idea to let more low power fm's in.

This is a very serious issue in our area and should be to all broadcasters. After the 80-90 docket, stations appeared everywhere, some to make money and others not. But it had a big impact on stations everywhere, with one more slice of the pie being cut away. Even with public stations, money IS being spent on them - leaving the commercial stations who depend on ads scrambling for more, cutting corners, etc. to make ends meet.

My voice is NO on LP FM.

Yours truly,

Roger Hill
