FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Dear *F.C.C. COMMISSIONER NESS*,

I am a supporter of creation of a Low Power FM (LPFM) radio service as outlined in the FCC's Notice of Proposed Rulemaking in docket MM 99-25, which called for creation of 1000 watt and 100 watt commercial and non-commercial LPFM stations nationwide.

It has come to my attention that the FCC intends to vote at its Jan 20th meeting to severely gut this proposal (NPRM) providing for only non-commercial stations with maximum power of 100 watts (coverage thus limited to only 3.5 miles as opposed to 9 miles for a 1000 watt station).

To place such severe limits on LPFM would doom the service before it begins, making it impossible to obtain enough financial support, without being able to sell commercial airtime, to exist.

What possible reason can the FCC give for not permitting commercially supported LPFM stations, other than to protect NAB member stations from competition? Commercial support has nothing to do with interference! There is no good reason to doom the LPFM service by taking away its ability to support itself by the sale of commercial advertising, a method of support that has served this nations stations well for over 75 years!

In fact to not allow commercial support would do a great dis-service to small businesses in America that cannot afford to advertise on full-power radio stations. Their needs would have been met by LPFM stations. A decision to not allow commercial support would have a vast negative impact on small business in America and may well violate some rules of the Small Business Administration.

I wish to remind you that there was an overwhelming number (thousands) of comments filed in this proceeding supporting the creation of 1000 watt and 100 watt stations, allowing for both commercial and non-commercial operation as set forth in the FCC's NPRM.
