

I live in Pearsall, Texas. Frio County (14,000 total county population). Our only radio station went 100 percent automated, only tapes. KVWG-FM. Heard about your low frequency radio on TV. Would like to reach 16 miles south of Pearsall to Dilley, and 13 mi. north to Moore. People used to get their news from radio here until automation. Would like details on how much low frequency equip costs, licensing, can the signal be bounced to Dilley and Moore so everyone could participate, etc., if possible. Thank you. Pat Shanley, maxfury@vsta.com, Box 102, Pearsall, Texas 78061
