Re: Ultra-Wideband  
ET Docket 98-153

It is my understanding that Time Domain Corporation is in need of the FCC's notice of proposed rule making on Ultra-Wideband radio to be approved for the continuation of this technology to provide life saving and effective operational opportunities to agencies such as ours.

The Astatula Police Department is a small, but progressive agency located in the state of Florida. We see the need for such a valuable tool. As stated we are a small agency, but we see the uses and the needs that this technology could be of in assisting all agencies involved in life saving.

We think that this technology can and will be very valuable in several different areas of life saving and that it could only be as assistance to the well being of the citizens, police officers, fire fighters and other life saving organizations.

Thank you for you time and consideration.

Chief C.L.Sink

Astatula Police Dept.
