RE: Ultra-Wideband

98-153

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

ET Docket ~~98-1530~~

I have been in law enforcement for over 25 years and have seen few technological advances that rival the potential as the ultra-wideband radar. If realized, this new technology *will* save lives during mass disasters, hostage situations, barricaded subjects, and a host of other life-threatening incidents that face law-enforcement on a daily basis. I strongly support this technology and urge the FCC to consider allowing the project to continue.

Sincerely,

Orville Callahan
Chief of Police
