

Petition to Deny LPFM Application

This is a formal petition submitted by DayStar Communications Inc. located in Coleman Michigan, under the provisions of 47 C.F.R § 73.870.

In FCC Report No. LPFM – S – 1, released on December 21, 2000, there has been an application submitted for LPFM Channel No 255, in Mount Pleasant, Michigan. It is respectfully requested by DayStar Communications, Inc to deny the processing of this permit. DayStar Communications, Inc. is in the process of petitioning to allocate Channel No. 255 for Remus, MI, for the construction of a class A broadcast facility. The new facilities 3.16 mV/m (70 db) contour will be in direct conflict with the proposed LPFM at Channel 255, in Mount Pleasant, Michigan. In the general interest of the submitting organization, a request is being made, to change the frequency of the LPFM application from channel No. 255, to either Channel No. 289 or Channel No. 299. It is believed that simple and minor request will dissolve future conflicts regarding a new FM facility in the area.
