

Please preserve the ITSF spectrum for education. The Greenbush =
Interactive Distance Learning Network facilitates 61 high school and =
college classes serving 1305 students in 49 sites in the eastern half of =
Kansas. The spectrum is critical in helping schools provide education to =
rural students and meet the requirements of the Kansas Regents Required =
Curriculum so students have access to classes required to attend Regents =
Universities in the state of Kansas.
Educating our children must be top priority and distance learning is one =
way our school districts are providing a curiclua that meets the needs of =
a ever-changing student population with classes that will help students =
meet their educational and career goals.
