

Dear FCC:

I would like to state my objection to the sale of Globalcrossing vital fiberoptic assets to foriegn ownership. First, you should note the future of wired technology is fiberoptics. Globalcrossing's assets account for more than 20% of the fiber coming into and out of the United States Of America. As a consumer I would hate to have a foreign corporation have a majority stake in such a significant amount of fiber that will over time be used more and more by American consumers, especially in the current climate of Global terrorism. It would be a major oversite by the FCC and the justice department if it were to allow a foreign company gain control of vital communications assests, particularly when a viable alternative and proposal exists that would benefit and just as well serve the consumers of this Country. I refer you to the proposed restructuring plan that can be found at "info@gbplxplan.com" which is sponsored by a diverse group of common shareholders. Additionally, Globalcrossing could divest itself of non-essential assets that would give it the financial strength that it needs to become a viable company. This company was built by Amercans to benefit Americans. To permit the purchase by Hutchinson Telemedia would result in a miscarriage of justice, and betray to the American people, by making the FCC an instrument of the underlying fraud that brought about this transaction in the first place.

Please reject the purchase proposed by Hutchinson. Note, sale of vital assets to a foreign interests to bailout an ailing company in my judgment would result in a violation of the trust Americans have placed in the FCC.

Very truly yours,

Joseph Dedvukaj
Southfield, Michigan.
