

Through various mergers, I was employed by Global Crossing for over 17 years when I was laid off in August, 2001. I was appalled when they filed bankruptcy in January, 2002 (my severance pay of 18 months and fully paid health insurance were immediately cancelled). What bothers me most at this time is the possibility that 2 corporations in Asia (Singapore Technologies and Hutchison Whapoa) may very soon be taking over what's left of GC. Does anyone in the FCC realize that at least one of these corporations are run by the Asian Government, see the possible security problems this takeover could cause the United States, and if so, does anyone besides me really care? If you do, and have the power to stop this merger/takeover, for the sake of all of us, please do. Thank you.
