

Dear Sirs,

Regarding ET Docket 02--135, I support fully the comments and supporting documentation of the ARRL(The national organization for Amateur Radio)dated January 27, 2003, regarding Public Notice FCC 02-322 released November 25, 2002.

As a practicing physician and licensed radio amateur, I have seen first hand the value of amateur radio communications, especially in emergencies such as that attack on the World Trade Center. Please do not allow our spectrum, which we use for the public good, to be taken over by commercial interests.

Thank You
