

Dear FCC,As a member of both the ARRL and the IEEE I want to express my concerns relating to BROADBAND OVER POWER LINE (BPL).

Ingress and Egress problems for both the user and the radio amateur will be a major problem and as a Professional Engineer involved in EMC studies both in the USA and Europe I know for a fact that there WILL be severe problems.

Please do not allow BPL in the United States as it will severely impact on the radio amateur and other spectrum users.

Regards,

Robert Read
Professional Engineer
