

Please do not sell off all the remaining spectrum in the UHF band in major metropolitan areas. As a professional user and owner of wireless microphones, our business is being negatively impacted by the ever diminishing number of available UHF channels in our area. This lack of spectrum will affect everyone using wireless mics, from churches to large entertainment events to political conventions. Please consider NOT selling any more UHF spectrum in the top 20 markets to organizations who will use it in an exclusive, full-time and permanent manner. Thanks for listening.
