

Good day, as a ham radio operator I urge you not to allow BPL or PLC (power line communications). There is every indication that this will cause unacceptable limits of radio frequency interference on the high frequency amateur bands. As a homeowner in a very rural area, where there is currently no DSL available, BPL would be the only way for me to gain high speed internet access. However I feel that it would be an unjust trade off in an emergency situation where ham radio communication could be a matter of life and death.

Thank you,
Mark Farrell
