

PLC in this country would be madness. Cause more problems than you could shake a stick at. Look at the results in Japan and in England. How much in favor is the Government towards Bizz to even think about this ? In my 68 years I have seen some stupid things done. The would be the worst of all. TVI would run rampant. Remember, those power lines are going to be antennas also !!! Feeding right into the devices you are trying to use !!. In signing I refuse to believe the FCC has even given this a passing thought. Please, Please, do not impliment this PLC program even on a trial basis. It is unworkable.

Thank You,

Richard Ray Dodson
