

I believe that the FCC should give serious thought to NOT implementing the plan for PLS. Its use could easily destroy the use of the HF bands for amateur radio operation. I have been a licensed amateur operator for nearly 30 years. I do not want the FCC to allow anything to be instigated, which would have such a broad, negative effect on my hobby. Please - DO NOT allow the use of this system. Amateur radio continues to provide a valuable and unique public service to our country, especially in times of disasters. The FCC must do everything in its power to protect the hobby, not destroy it. Thanks for your careful consideration of this important issue.
