

Please do not let BPL/PLC happen as it has been shown in Japan and parts of Europe to cause major interference. I know that the people that are asking for this won't tell you about it but the studies overseas tell a different story. Please listen carefully to the ARRL lab guys they will tell you the truth about what can and will happen. Or just put out a call of the people that have FIRST rights to the freqs that are now being used. I oppose this use of the amateur bands for what is now going on. Thank you for giving me a chance to vent a little. Have a great day. Bill Baker amateur call sign: kd5icr
