

I am not in favor of BPL because I understand it has been TRIED in others countries.

It causes interference to TV and other communications. One country was Austria. They

discontinued using it. I am AGAINST BPL and do not wish to see it implemented. Further along, if serious implementaion is considered I will wirte ot my Congressman and my Senator

It interferes up TV and Amateur Radio. It is only a way for power companies to make money and they are supposed to cause interference to TV, Radio, or any other use of the radio sprectum. Thank YOU.
