

I'm an amateur radio operator KG4VXS. As I sit here listening to the HF interference, I can't imagine having a lot more created by this PLC program you are entertaining. And to simply save consumers a few bucks by not having to run extra wires, etc at the expense of people who use the airwaves for pleasure, etc just isn't feasible. I would urge you to reconsider this venture and to consider the havoc it would wreak upon a lot of citizens. Thanks for the opportunity to express my feelings. R M Hollifield
