

As a Amateur Radio Operator, I along with many of my fellow "Hams" are opposed to BPL taking effect due to the additional ambient R.F. radiation which will cause not only radio interference but will also place our neighborhoods in an all encompassing R.F. field.

This is NOT what myself and my neighbors want and urge you (the F.C.C.) to not pass 03-104. If there was trouble in the past with the public and High Tension Line radiation , wait until the News Media gets ahold of this. Personally , I dont want my tax money being spent in research tests and court costs to profit the "Corporate Wants" that strive to gain the last dollar available from the public.. Thank You for your time and listening to how the public feels about this subject..
