Re: Ex Parte Presentation in WT Docket No. 02-146

Dear Ms. Dortch

On May 16, 2003, representatives of Cisco Systems met with representatives of the Commission's Wireless Telecommunications Bureau and Office of Engineering and Technology to discuss Cisco's vision for the 71-76 GHz and 81-86 GHz bands. Present at the meeting for the Commission were John Muleta, D'Wana Terry, Tom Stanley, Keith Fickner, and Mike Marcus. Present for Cisco were Matt Bruening, Dave Stephenson, Jon Leary, and undersigned counsel.

Cisco's presentation covered the highlights of Cisco's written comments in this proceeding. Specifically, Cisco's representatives outlined their view of the applications that will likely be the demand drivers in these frequency bands, the deployment models that the Commission should strive to accommodate, and the licensing and coordination regime that should be adopted. I am attaching a copy of the slides that were presented.

In accordance with section 1.1206(b) of the Commission's rules, I am filing one copy of this notice and the attached presentation electronically. If you have any questions, please do not hesitate to contact the undersigned.

Respectfully submitted,

/s/Mark A. Grannis
