

Dear Commissioners,

I am a radio amateur and strongly oppose the BPL. It poses a severe threat to Amateur Radio HF operations, MARS operations, radio telescope operations and homeland security HF radio operations. In the face of ever increasing interference suffered by all of the above and the overwhelming number of alternative choices for broadband internet access to the consumer, I can not and will not support allowing the power companies, who have shown based on the number of reported power line interference complaints, a complete inability to prevent harmful interference, to operate broad band carriers on the existing power grid.

Sincerely,
Michael Hullhorst
Amateur Radio Operator KC8OVN
