

Thank you for reading these comments.

The proceedings before you concerning BPL/PLC concern me greatly. I feel that; #1 not enough testing has been and are ongoing and #2 what testing has been done has resulted in results that the companies interested in seeing this technology come to fruition have been slewed in their favor.

I am afraid of what damage will be done to the radio spectrum used by many services, including the Amateur Radio Service of which I am a licensed part.

Thank you for your consideration.
