

I am a dishnetwork customer and we have lost our local abc33/40 station. I contacted dish and they say that the fault lies with Allbritton Communications and 33/40. Then I e-mailed them and they say fault is with dish. I as a longtime customer of both am the one whom is paying for the childish way this is being handled. It doesn't matter to me who is to blame if they would just fix it!! Again, I depend on my local abc for my news and since I live in an area where there are alot of tornadoes I need my local weather. I don't need to know the weather in Washington or anywhere other than Alabama.
PLEASE HELP!!
Thank You,
Shelly Sealy
