

I support the ARRL and its opposition to BPL/PLC, HF & VHF communication over power lines. As an amateur radio operator, one-time student pilot, and vessel operator, I am aware of the life-threatening implications of interference in amateur and other services in these bands.

Please do not allow this type of service to be installed. If it must be tested, please ensure it is not tested within fifty miles of an air service radio facility or significant body of water

Sincerely,

Tom Young, KD1UL
