

My name is Greg Compton and I would like to express my feelings on the above mentioned proceeding (03-104). If the Broadband by Power Line goes into effect it will cause very harmful interference to the amateur radio service. The interference could prevent or at least hamper our efforts to conduct emergency communications as well as day to day communication on most if not all of the HF spectrum that we now have access to. The FCC has always been a great friend and protector of the amateur radio service. Please do not stop now. Thank you for your time and attention in this matter. I, along with the rest of the amateur radio community are depending on the commission to protect the amateur radio service from this very detrimental proposal.

Greg Compton (N5ZFW)
Vice President
Cherokee County, Tx. Amateur Radio Club
