

Gentlemen: We must insure the protection of one of our most valuable resources, amateur radio, from interference from your proposed PLC program. I am president of our local radio club and the entire club utilizes these frequencies for public service from the St George Marathon and Huntsman World Senior Games to our regular emergency preparedness exercises conducted weekly. I am afraid you are not fully considering what impacts this may have on our ability to serve our community in an emergency. You have promised to oversee and protect our priceless radio spectrum from being perverted and I hold you to your sworn duty as God is my witness.
