

Dear FCC,

I'm a third generation Ham and it's been my experience that the electric utility companies have had a very poor track record of handling even the simplest power line interference problems in the past. They don't have the resources nor the inclination. I submit that the proposed widespread use of BPL even under the existing FCC regulations will cause significant interference to a myriad of licensed communication services.

I urge the FCC to raise the interference standards and lower the power limits on BPL in order to protect the HF and lower VHF bands.

Sincerely,

Eric H. Steenburn
