

To whom it may concern: I have been involved in amateur radio for 23 years. It has been an inspiration and guiding light for my career. I am heavily involved in the HF spectrum. Ham radio is a wonderful instrument during emergencies as well as a educational tool when not. I think it would be a tragedy to lose such a fun and valuable tool because corporate america wishes to make more money at the expense of amateur radio. The interference issue is disturbing to me to say the least! Broadband over powerline will simply destroy the HF bands as we know it. Please consider the interference issues and please don't let this destroy amateur radio.

Thanks for listening.

Sincerely,
Christopher Pracht (KF6VF)
