

Amateur Radio is a valuable resource and must be protected. Implementation of Broadband Over Power Line (BPL) will destroy Amateur Radio frequency use.

I have used my amateur radio station to assist with earthquake and hurricane communications when ALL commercial radio and telephone systems were damaged or destroyed, during my 32 years as an Amateur Radio Operator. I know I helped and made a life saving difference.

Present FCC Part 15 limits for BPL can result in substantial interference potential to amateur frequencies.

The FCC has promised to protect Licensed Users of the spectrum. The FCC must remember this promise and not approve BPL.

Sincerely,

Jim Miller, K4SQR
