

Dear Sirs, I tried to send a message yesterday but received an error.

I am a licensed amateur radio operator with callsign WB2AZE. I am also a member of the Amateur Radio Emergency Service, ARES and am the coordinator for Hunterdon County in New Jersey. I understand that BPL causes interference on the HF amateur Bands as well as the 2 meter band. ARES and Amateur radio operators are part of the Citizen Corps under Home Security. We as amateurs will not be able to function in emergency conditions if there is interference to our bands. As an amateur who volunteers his time to assist my community, I believe that BPL should not be allowed to potentially harm our ability to support our country in a time of crisis.
