

I am extremely concerned about the use of BPL. I am an amateur "ham" radio operator in a congested, urban area and have enough ham radio interference already. If BPL is used, I might never be able to talk with other hams and emergency, practice check-in nets that I participate with. Please hold off on BPL until more detailed studies including the ARRL (www.arrl.net) officials has been done. I thank you for your time and consideration.
