

I am an Emergency Ham Radio Communicator in Brentwood, CA. I am seriously opposed to Broadband Over Power Lines because it will degrade Amateur Radio communications. In order for us to function effectively in times of disasters, it is necessary that radio communications be as clear as possible. Please reconsider, and vote against this use of Power Lines for Broadband. It seems that disturbing Emergency Radio Communications would work against our Country's new plans for Homeland Security.

Respectfully Submitted,

David Ditlow, K6LDO -  
Brentwood Emergency Response Corps  
Emergency Radio Communications Director
