

I am a licensed amateur radio operator, GMDSS Operator and Maintainer and a General Radiotelephone Operator. I believe that based upon ARRL findings, that BPL will cause enormous harm to the HF frequencies. Not only will it affect amateurs but GMDSS and other disaster services as well as Coast Guard, military, MARS etc. The interference will be of unregulated proportions. Currently, based upon FCC enforcement letters to utilities for interference, it is not a priority among utilities to clean up the interference generated from their systems. Please do not allow the damage to be done to the entire HF spectrum by BPL.

Sincerely,

Gregory J Dober
