

I whole heartedly oppose the use of powerlines to carry broadband internet signals. The amateur bands have enough interference already from natural and manmade sources. Please, do not cause even more interference from BPL. I don't have to tell you the importance the amateur world plays in emergency communications and BPL will virtually closed the doors on HF communications. BPL will surely discourage new amateurs from joining the ranks. This is our hobby, but to some it is a life style, and others it is a necessity. We have been slowly winning the war against antenna restrictions, now we have to fight this war. Halt it now and stop putting the big bucks in the pockets of the internet providers and utility companies.
