

I cannot believe what I'm hearing, that BPL is not harmful to Amateur Radio! The FCC totes high honors when the Hams are needed in emergency situations. It fines and/or revokes liscensed privileges if harmful interference is incurred. And yet, if the BPL generates \$\$\$\$\$, it's OK to inconvenience the Amateur Radio community.

I SPENT 12 YEARS TO GET TO THE HIGHEST LISCENSE in Amateur Radio, And I won't go Down w/o supporting and fighting along side of the ARRL. BPL is wrong because of the transmission interference. It's a shame that you think we (Ham Radio Operators) are a disposable lot!
