

I am absolutely opposed to the FCC allowing the use of BPL for internet access. The FCC will bear full responsibility for destroying the ability of Amateur Radio operators to provide public service communications on HF. You should listen to the evidence. Here is a link to a MPEG video of actual interference documented:

[http://216.167.96.120/BPL\\_Trial-web.mpg](http://216.167.96.120/BPL_Trial-web.mpg)

Is this what the FCC is proposing with BPL to destroy the HF spectrum as we know it? You have the power to stop this insanity.

I am going to push to have our local elected officials pass local ordinances prohibiting the use of BPL in our jurisdictions. If the FCC won't stop this, our local government can.
