

Broadband over Power Lines is a bad idea. I am all for expanding broadband to everyone but BPL is not the way to do it. BPL will cause unnecessary interference to many services now using HF spectrum and destroy emergency communications and military communications systems that have been used to save thousands of lives. Use the right of ways and power poles to run conventional non-radiating cable to extend broadband to remote areas. It is a proven technology that works and will be cheaper to implement.  
Thank you for considering my comment.
