

As a licensed (FCC) amateur radio operator for the past 50 years, I wish to strongly protest the Broadband (BPL) plans under consideration. This plan should be THOROUGHLY tested before being implemented. Amateurs will most likely suffer the biggest loss in spectrum, but AM (commercial) radio stations will also be affected.

Through the years we "hams" have enjoyed fair treatment from the FCC, with frequent changes in operating privileges, changes in the licensing requirements, and occasionally - some losses in frequencies. I respectfully ask that you study this proposal for its impact upon those of us who have invested our time, efforts and money in equipment in order to be of service to our community and our country. Sincerely, Katherine Anderson, W8DUV
