

As an Extra licensed amateur radio operator,  
I experienced the Russian Woodpeckers destruction of  
the amateur frequencies for years. With BPL as a  
possibility, it appears that the destruction of the amateur  
frequencies will come from within my own country this time  
and even be worse than the Russian Woodpecker situation.  
Fortunately the Russians halted their interference.  
Let's do them one better this time and not create the  
problem to begin with. There must be other ways than BPL.
