

Please do not let this pass. The Amateur Radio Community will be Adversely affected by this proposal. We are already dealing with electrical line noise and this will make it far worse! Amateurs Provide Emergency Communications in time of need and our normal operating conditions should not allowed to be worsened by this plan. Our Valuable Services are provided Free of Charge to our Communities. We purchase, build, and maintain our radio gear without any money from the community. Please do not make our Service operating conditions any tougher than it needs to be. We will be happy to work with you on this plan. The ARRL is very active and we plan to fight for what is right. Thank you.
