

After viewing the ARRL's video regarding BPL at [http://216.167.96.120/BPL\\_Trial-web.mpg](http://216.167.96.120/BPL_Trial-web.mpg) and reading the article on their website, I am very concerned that this could cause wide spread interference on the amateur bands in the HF and VHF-Low spectrum. I understand the FCC is still accepting comments regarding its acceptance of BPL. I strongly urge you to consider the interference that allowing of BPL would cause when making your decision. Thank you.
