

This is not a good thing for the USA. Being a Freq Manager with the US Army. This is going to, not only kill the HAM radio, but many systems that are HF that support government programs. i.e FEMA, US Army, USAF, Navy. etc. I ask the FCC to stop this before it gets out of hand. Japan does not use do to the issues that it WILL EFFECT HF, and the other counties that use it now have nothing but troubles with it. I have spent 20 years in the Army using HF, it has been there when all other systems did not work, as a Ham it is the soul of what we do for this country. HF is King, BPL will distory it. SFC Furlow 5th SFGA Freq. Man.
