

I am a FCC licensed Amateur Radio Operator, W4BCG-Billy Gage, and I am very concerned that the proposed BPL/PLC communication over local power lines will destroy the present operation of Amateur Radio operators here in the United States. Signal leakage and radiation from the lines will reduce the reception of normal amateur radio signals which are critical for hams to support any emergency future communications in this country. Please vote against the BPL/PLC issue. Bill Gage, W4BCG
