

GENTLEMEN;

As a radio amateur of 50 years, licensed K2DOX in 1953, I must ask you to seriously consider whether you wish to destroy a valuable asset such as AMATEUR

RADIO in favor of a commercial venture such as BPL.

Allowing the transmission of signals over power lines has been proven to result in serious degradation of HF operation in the amateur bands.

In the present condition of the world, with the potential for terrorist havoc in our country such an elimination of a valuable resource as amateur radio communication seems shortsighted and dangerous.

Please consider the public benefit of amateur radio over the last 75 years and not techniques and technologies that would eliminate these benefits

A> AIMETTE, W2OX
