

I am concerned about the extreme RFI to Ham or Amateur Radio by BPL!
I am also concerned about RFI problems to our laboratory equipment,
and suspect that BPL will make the situation worse! RFI has already
caused one incident of spurious N-15 data on a \$200,000 mass
spectrometer. We are neither in a position to replace or set up
major RFI shielding in our laboratory. Please cease and desist BPL.
Thank you.
