

Dear FCC officer,
I have recently listened to interference on the
amateur radio HF bands (3.5 to 28 mhz) caused by the
test deployment of the BPL data delivery system in
selected east cost towns. After listening to this I
am very concerned that deployment of this system
nationwide, as is, would destroy amateur radio. I
could go on about the merits of amateur radio for
emergency communications, the fairness of big business
destroying a hobby enjoyed by a significant number of
US citizens, etc, but I'm sure you understand those
issues. Instead I wanted to voice my displeasure. I
intend to similarly email my govt representatives and,
if this system continues to be considered will do
everything I can to oppose it.

Regards,
Gary Slagel
