

Dear FCC,

I have been a licensed radio amateur for 48 years and been active on the bands for all of that time. i have seen changes in our operating but always the hobby has produced young men and women with advanced technical skills.

Approving this proposal will limit, if not destroy the amateur high frequency spectrum.

I am sure that there are many other ways to transmit high speed data that is cost efficient. Please consider other methods. Do not allow 03-104 to pass.

Yours truly,
Larry Pace
