

I feel that allowing bpl would be very destructive to the communities it serves. The noise it would produce could have broad effects of disruption of electronic equipment as well as highly reliable communication source Of Amateur Radio. Which has proven to be indispensable in times of distress and disaster. While the noise may not be present during emergencies the skills needed to communicate need to be practiced and honed as to best serve the public.

Please do not allow the technology to go forth.

With all of today's technology there must be a better answer.
